NOLOGY of Remarkable Events in the present WAR,
Of the Settlement & Increase of NEW-ENGLAND.

Of Raising F L A X - S E E D.

By Nathaniel Ames.

PLENTY three Years our crowded Graneries fill'd
'Ere SOL's fierce Beams the blighted Pastures kill'd.
When Drought for Rains suppress the *Nilus* flow.
In *Egypt's* Plains no Fruit nor Herbage grow:
When seven full Streams had seven large Harvests crown'd
Then seven long Years with Famine curst the Ground:
If Nature sure this Contrast still maintains,
One Year of Drought and Scarcity remains.

BOSTON. Printed & Sold by J. Draper, in Cornhill, R.
Draper, in Newbury-street; Green & Russell, and Edes &
Gill in Queen-street; and T. & J. Fleet at the Heart and
Crown in Cornhill. Sold also by the Booksellers

Price Half a Dollar per Dozen, or Six Coppers single.

R E A D E R,

WHAT I have said concerning the Continuance of the Drought and Scarcity this Year, in the Title-Page Verse, is a Conclusion drawn from Premises that are not universally certain, therefore the Conclusion, viz. that this Year 1763 will be a dry and scarce Year is not certain. — He who has fore-ordained whatsoever comes to pass, knows, and he only knows with absolute Certainty, what will come to pass: The Book of Fate is hid from all created Beings: — Creatures know future Events only by Way of Argumentation and Deduction: and indeed in some Instances there is such a Connection between the Premises and Conclusion that the Event is known with great Certainty; but in general we know nothing of the Connection of Things, we cannot see the Links of that great Chain which binds with certainty all the Events of the wide extended Universe: Indeed the Devil does not know so much of future Events as many expect an Almanack-Maker should foretell, although it must be owned that they are willing to allow him the Help of the Devil for his Information.

I HAVE been often requested to explain some Things relating to the Moon's rising and setting. — Astronomers begin their Day at 12 o'Clock at Noon: I have told you that in September it will be New Moon the 7th Day at 11 in the Forenoon, but if I had spoken in the astronomical Language I should have said New Moon September the 6th Day at 23 Hours past Noon; but in the Almanack I conform to the common and vulgar Method of Computation, that is, beginning the Day at Midnight, and continuing it till the Midnight following; and the first Moment of Time after Midnight belongs to the Morning of the next Day: Now for Example, How are you informed of the Moon's rising upon the 2d Day of May, when if you look into the Almanack you find no Figure, but the Word Morn. to stand against the 2d Day of May? Why, the Moon does not rise at all that Day or within that 24 Hours, which according to this Method makes the 2d Day; for on the 1st Day of May the Moon rises at 11 Hours 26 Min. at Night, from which Time to the Moon's next rising is 24 Hours 43 Min. which carries the next rising to 9 Min. in the Morning of the 3d Day; so that the 2d Day is a Blank on which the Word Morn. stands, which denotes that the following Days until the Change the Moon rises in the Morning preceding or going before the Day: You are not left uninformed of the Moon's rising at any Time, for instead of calling it 9 Min. after Midnight the 2d Day it is properly 0 Hours 9 Min. in the Morning of the 3d Day, for since the Day begins at Midnight the preceding Day ended at Midnight, the Division is at that Point

of Time, and the Darkneſs of the Night from the Day-Light's ending till Midnight belonged to the 2d Day, and from Midnight till the Dawn of the Morning, to the 3d Day. From whence it is eaſy to conclude that on any Night when the Moon riſes after Midnight the Time of her riſing muſt be ſought for in the Almanack or the Morning of the next ſucceeding Day.—And if there ſhould be any ſtill that cannot underſtand this Myſtery, nor the Explanation I have given of it, I ſhall conclude they were born in the Dark of the Moon, and I would adviſe them not to trouble their Heads about any Thing that is in the Almanack.

NATH. AMES.

There will be but two Eclipſes this Year

1763, both of the SUN, and inviſible.

I. The firſt will be April the 3d Day, at 5 in the Morning.

II. The ſecond will be October the 6th Day, at 8 at Night.

The Vulgar Notes for the Year 1763.

The Difference of High-Water at ſeveral Places, from the Time ſet in this Almanack.

IT is High-Water two Hours & 20 Minutes ſooner at Tarpaulin Cove, New-London, and New-York; — three Hours ſooner at Rhode-Iſland and Amboy; — five Hours ſooner at Sandy-Hook; Five Hours and Half ſooner at Albany; — three Hours later at Philadelphia; — Half an Hour later at New-Haven.

IN the laſt Page but two there is an Account of the Advantage of Preſerving FLAX SEED, thoſe who bring it to Market may depend upon having Silver or Gold therefor of thoſe Gentlemen in Boſton who advertiſe to purchaſe.

IT happens every Year that ſome Tavern-Keepers in one or other of the Governments give up their Licence, and others are ſubſtituted in their Room: It is therefore requeſted for the Benefit of Travellers as well as their own, that ſuch new Licenced Perſons would ſend a Letter free of Charge to the Author living at DEDHAM, that it may be inſerted the following Years.—They muſt be particular in expreſſing the Number of Miles they are from the Stage ſhore & after them,

WHILST *Capricorn's* cold Tropic bears command,
The naked Trees in frozen Armour stand,
Bound fast with Ice the Waves no longer roar,
But with stiff Arms embrace the silent Shore ;
The mighty Hills lie cover'd deep in Snow,
And all the cold Allies of *Boreas* blow.

IF we could chuse the Time, and chuse aright,
 'Tis best to die our Honour at the Height :
 When we have done our Ancestors no Shame,

 Then should we wish our happy Life to close,
 And leave no more for Fortune to dispose.

IV. April hath 30 Days. 1763.

FROM Southern Climes the cheerful Sun returns,
And the late frozen North now gently warns ;
His subtle Penetration op'rates so,
He does but look on Flowers and Plants, they grow :
His loving Beams sweetly salute the Spring,
And dart their Virtue into every Thing.

WHEN Sol descends, what Golden Streaks arile,
And Tracks of Glory paint the Western Skies:
This is the Time when witty Boets tell
That *Phœbus* into *Thetis'* Bosom fell:
She blush'd at first, and then put out the Light,
And drew the modest Curtains of the Night.

To live uprightly then is sure the best

To save ourselves, and not to damn the rest.

XI. November *bath* 30 Days. 1763

AS o'er their Prey rapacious Wolves engage,
 Man dies on Man, and all is Blood and Rage;
 With copious Slaughter all the Fields are red;
 And heap'd with growing Mountains of the Dead;
 Fierce *Disord* storms, *Apollo* loud exclaims,
Fume calls, *Mars* thunders, and the Field's in Flames.

XII. December hath 31 Days. 1763.

THE temperate Man nor ever over feeds
 His cramm'd Desires with more than Nature needs;
 For Nature wisely stints our Appetite,
 And craves no more than undisturb'd Delight;
 Which Minds unmix'd with Cares and Fears obtain,
 A Soul serene, a Body void of Pain.

Of Raising FLAX.

EXPERIENCE has, I doubt not, convinced the Farmers in this Province, how advantageous the raising of FLAX is; and this Branch might still be more beneficial, if proper Care was taken to save all the Seed. By the best Accounts there has only yet been exported from 1900 to 1200 Casks, of about 7 Bushels each, in a Season. While at *New-York* there is from 8 to 9000 Casks annually ship'd off: And at *Philadelphia* from 10 to 12000, which makes a considerable Remittance. Now if we suppose, that out of 45,000 Families, said to be in the Province, that only 25,000 of them save one with the other but one Bushel of Seed, this would make 3500 Casks. The Farmers will always find Sale for it, and be paid in ready Money; and have still this further Satisfaction that so much as they save of this Article, the same Value of Silver and Gold they prevent from being exported; and the many Disadvantages arising from sending away Money, is so plain to every one, that we are likely very soon to feel the bad Effects of it.—

Of the Settlement and Increase of New-England.

AS Providence has smiled upon the *British* Arms this War, we have Reason to hope, that upon a Peace *Canada* will be ceded to the *English*; if that should be the Case *America* will reap the happy Fruits of a bloody War. A vast extent of Territory will be added to the *British* Empire in *America*; and as long as *Canada* is held by the *English*, we shall have Peace with the Savages; so that that War which at first seemed like to break up our new Settlements will in the Conclusion greatly promote and increase the Settlement and Peopling of *America*.—A vast Tract of excellent Land lies between No. IV. and *Crown-Point*. I am informed of above Twenty Townships granted in these Parts which will soon be peopled. The Hon. BENJAMIN FRANKLIN, Esq; in his Observations concerning the increase of Mankind, &c. says, “People increase in Proportion to the Number of Marriages, and that is greater in Proportion to the Ease and Convenience of supporting a Family. When Families can be easily supported, more Persons marry, and earlier in Life.” And in another Place he says, “Land being plenty in *America*, and so cheap as that a Labouring Man that understands Husbandry can in a short Time save Money enough to purchase a Piece of New Land sufficient for a Plantation, whereon he may subsist a Family.” But now behold! the Farmer may have Land for nothing; Land that will produce all the Necessaries of Life without Money and without Price.—Land enough for himself and all his Sons, be they never so many, only for taking up and accepting of the same: Not single Townships now offer themselves to the lucky Persons that shall obtain Grants to the Exclusion of the rest, but here is Land enough for all: Townships to be collected into new Governments and Colonies, extent of Territory large enough for a Kingdom!

The ingenious Mr. STYLES has published a curious Table, which he has given me leave to transcribe, viz.

A Table of Increase upon half a Million Inhabitants in the four *New-England* Governments for the present Period of doubling. By inspecting which may be seen the Number of Inhabitants in *New-England* for each Year.

A.D.	A.D.	A.D.	A.D.
1760—500,000	1767—607,090	1774—737,135	1781—895,025
1761—514,050	1768—624,170	1775—757,857	1782—920,185
1762—528,510	1769—641,710	1776—779,165	1783—946,060
1763—543,370	1770—659,760	1777—801,070	1784—972,655
1764—558,650	1771—678,305	1778—823,590	1785—1,000,000
1765—574,350	1772—697,370	1779—846,745	1810—2,000,000
1766—590,500	1773—716,971	1780—870,550	1835—4,000,000

This Table A. D. 1760, supposes the Inhabitants of the four *New-England* Governments to be half a Million, or 500,000, and the Period of doubling to be 25 Years, so that in 1785 they will amount to 1,000,000. But when we consider the thirteen *British* Governments upon this Continent, from *Novascoetia* to *Georgia*, the vast extent of disputed Claim secured by this Conquest, as well as the great Country of *Canada* it self; I say, when we consider these Things and look forward, all Computation is lost: We may rather apply what the Almighty said to *Abraham*, concerning the Settlement of *Canaan* by his Posterity, * "Lift up now thine Eyes, and look from the Place where thou art, Northward, and Southward, and Eastward, and Westward; for all the Land which thou seest, to thee will I give it, and to thy Seed forever; and I will make thy Seed as the Dust of the Earth, so that if a Man can Number the Dust of the Earth, then shall thy Seed also be numbered." * Gen. xiii. 14. 15.

We hold our Lands under no other Lord but He who gave the Land of *Canaan* to *Abraham*: 'Twas He who directed our Planters in their Navigation over the *Atlantic* above 140 Years ago, which was then a difficult Voyage; and when they had arrived at an inhospitable Shore, and waste Wilderness in the dead of Winter, without one Accommodation of Life, with nothing but the Heavens to skreen them from the Cold, what but Almighty Power did preserve them! And when they were all Friendless, Strangers, and but few in Number, and inevitably engaged in a War with the Natives, infinite Goodness prevented their utter Extirpation; and the same Hand has visibly conducted them through every Stage of their increase; and in our Memories are many recent Instances of the Interposition of Providence; witness the Destruction of *Duke de Anville* and his Fleet, A. D. 1747, and the signal Successes of this War. Great Things are to come to pass in *America*, which ever Year gradually unfolds and opens more and more to our View.
